

SEXUAL HEALTH INFORMATION

The following websites are great resources and offer more in depth information about sexual health issues young people may be facing now or in the future. Whatever a person chooses, it's important to talk to a health professional, parents, guardians or a trusted adult to be able to make well-informed decisions.

Statistics from the 5th National Survey of Australian Secondary Students and Sexual Health 2013, show that only 23% of Year 10 and 50% of Year 12 students have had sexual intercourse.
